

General Description

BDE-BLEM215 is a Bluetooth 4 and 5 single-mode compliant Bluetooth low energy module targeted at low power sensors and PC/Phone accessories.

BDE-BLEM215 highly integrates Bluetooth Low Energy radio, stack, profile and applications in a SoC, without the need of using an external MCU. The module also offers flexible hardware interfaces for the sensor application. It supports 2 Mbps and PHY-coded which are the new added features from BT5.0.

It enables ultra-low power connectivity and data transfer for the applications that are sensitive to power consumption, size and cost.
